

# ANUBHAV KUMAR

## Data Analyst | Data Scientist

+91 72238 27840 | [anubhavkumarkanth123@gmail.com](mailto:anubhavkumarkanth123@gmail.com) | [linkedin.com/in/anubhavkumar021](https://www.linkedin.com/in/anubhavkumar021) | [github.com/Anubhavkumarkanth](https://github.com/Anubhavkumarkanth)  
Bengaluru, Karnataka · B.E. Electronics & Communication, NMIT · 2026 graduate · Available to join immediately

### SUMMARY

2026 engineering graduate targeting Data Analyst and Data Scientist roles, skilled in SQL, Python (Pandas, NumPy), Excel, Power BI and machine learning with Scikit-learn. Built a data cleaning-to-model pipeline on 4,624 NHANES records that beat a standard formula baseline, and a Monte Carlo simulator that reports P10/P50/P90 outcomes. Kaggle-certified in Intro and Advanced SQL.

### EDUCATION

**Bachelor of Engineering (B.E.), Electronics and Communication Engineering**

Nov 2022 – Aug 2026

Nitte Meenakshi Institute of Technology (NMIT), Bengaluru | NAAC A+

### TECHNICAL SKILLS

**Data Analysis:** SQL (joins, CTEs, window functions), Python, Pandas, NumPy, data cleaning, exploratory data analysis (EDA)

**Visualization & BI:** Power BI, Tableau, Excel (Pivot Tables, VLOOKUP), Google Sheets, Matplotlib, Seaborn, dashboards

**Statistics & ML:** Scikit-learn, regression, Random Forest, feature engineering, MAE, RMSE,  $R^2$ , Monte Carlo simulation

**Databases:** PostgreSQL, MySQL, SQLite, SQLAlchemy, schema design, indexing, EXPLAIN ANALYZE

**Tools & Languages:** Jupyter Notebook, Git, GitHub, Streamlit, FastAPI, Docker, pytest, Java, JavaScript, TypeScript

### PROJECTS

**Dietbot: Calorie-Intake Prediction on NHANES Data** | Python, Pandas, Scikit-learn, PostgreSQL, Streamlit | [GitHub](#)

- EDA on an inherited 99-row training set showed every macro label was a fixed multiple of calories ( $r > 0.999$ ), so the old model could only relearn a formula. Replaced it and rebuilt the notebooks into a tested package.
- Wrote an ETL script joining three CDC NHANES 2017–2018 files; filtered to adults aged 18–80 and dropped incomplete rows and implausible intake, leaving 4,624 clean records.
- Tested four model designs against baselines and kept one: a Random Forest (60/20/20 split, tuned on validation only) with test MAE 632.9 kcal vs 650.6 for the Mifflin-St Jeor formula and 684.4 for a mean baseline ( $R^2$  0.130 vs 0.071).
- Documented the model's limits:  $R^2$  stays low because single-day dietary recall is noisy (test SD  $\approx$  855 kcal); also fixed two correctness bugs in the inherited code.

**SIP Friction Analyzer: Investment Behaviour Analytics** | Python, PostgreSQL, FastAPI, React, TypeScript | [GitHub](#)

- Defined three metrics (Contribution Compliance Rate, compounding loss, 0–100 Discipline Score) that measure what skipped, reduced or paused SIP contributions cost, with year-by-year dashboard charts and a reporting endpoint.
- Wrote a Monte Carlo engine that runs 1,000 randomised return paths and reports P10/P50/P90 outcomes, scaling annual volatility to monthly by  $\sqrt{12}$ .
- Designed a PostgreSQL schema with foreign keys and CHECK constraints; a composite index, checked with EXPLAIN ANALYZE on 20,000 test rows, cut query time from 1.80 ms to 0.47 ms.

### EXPERIENCE

**Java Full Stack Development Intern** | Redevelopers Automate Solution Pvt. Ltd.

Feb 2026 – Apr 2026 | MP

- Built RESTful APIs in Java Spring Boot, improving application performance by 30% and cutting server response time by 50%.
- Designed and managed SQL and NoSQL database components for application data persistence.
- Found and fixed software defects; wrote unit and integration tests.

### CERTIFICATIONS

**Kaggle SQL (Intro to SQL and Advanced)** | Kaggle

2026

- Certified by Kaggle in Introduction to SQL, building practical skills in working with and analyzing data using SQL.
- Certified by Kaggle in Advanced SQL, developing the ability to solve complex data problems and extract meaningful insights with SQL.

**Career Essentials in Data Analysis** | Microsoft & LinkedIn

2026

- Certified by Microsoft and LinkedIn in data analysis fundamentals: gathering, cleaning and preparing quality datasets.
- Covered data visualization and analysis in Power BI, Python, Excel and PostgreSQL.

### LEADERSHIP

- Design Team Lead, ASE Club:** organised I-Solve, a national-level hackathon with Bangalore Traffic Police (100+ participants).
